

FCC ID Label location

The Luna Ring is a device whose commissioning and actual use requires a mobile phone or tablet. The ring itself does not have any user interfaces; it only measures temperature and motion. The Luna Ring is designed for Android and iOS operating systems, and it works exactly the same way on both operating systems and also looks visually identical in both.

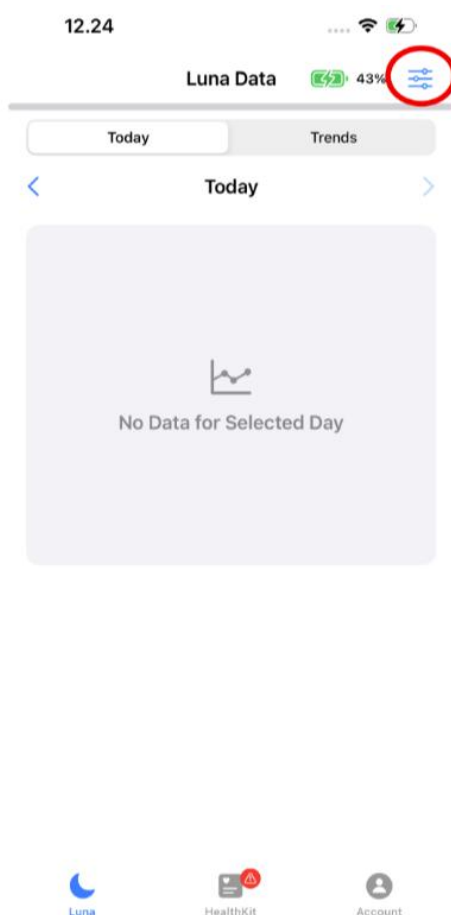

LUNA FCC ID: 2BT6JNCRI01WA

The FCC ID does not fit on the ring itself, even with a 4 pt font, without covering other icons that are important for use, such as the magnet symbol, size, and Data Matrix code.

FCC ID can be found as following:

1. Open the Natural Cycles mobile application on your phone.
2. Press the LUNA ring settings icon in the upper-right corner.

- Find the FCC ID in the Regulatory Information chapter, just after Device Details.

 **Device Details**

Name	NCREO2508290447
Type	Luna Smart Ring
Ring Size	US 8
Model (reported)	—
Color (reported)	—
Protocol	BLE 4.0+
Device ID	0C108508

 **Regulatory**

FCC ID	2BT6JNCRI01WA
IC	TBD
Model	NC-RI01-WA

This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

 **BLE Services**

Luna Service	Connected
TX Characteristic	Available
RX Characteristic	Available
Notifications	Enabled

 **Device Status**

Rec Temp Limit	20°C
