

Car portable air pump (Bluetooth speaker)

User Manual

(Please read this manual carefully before use)

Warning

Children should not operate alone.
Do not use in direct sunlight or at high temperatures/pressures (do not place on the dashboard of a vehicle).
Do not immerse the machine in water, expose it to rain, or use it in water.
Do not drop the machine from a height to avoid damage to the equipment.
Turn off the power switch when not in use.

Follow these rules and all instructions to avoid property loss, electric shock, burns, and other injuries.

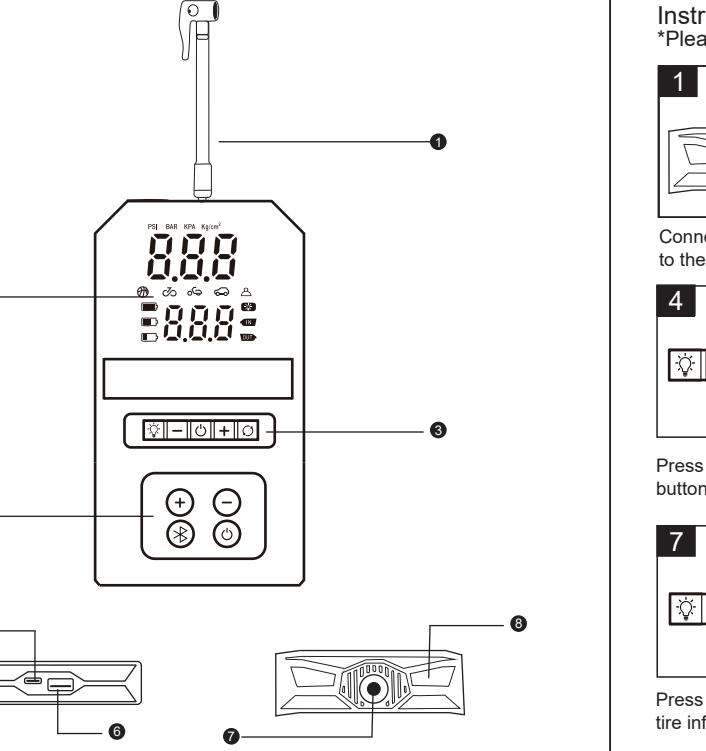

Attention

To reduce the risk of electric shock, do not expose it to rain, store it indoors and away from fire sources, and the charging time should not exceed 5 hours.
Attention:
1. This product operates normally and may generate slight heat, which is a normal phenomenon.
2. To ensure the air pump works well, the continuous inflation time should not be too long.
If long operation is needed, please take intermittent breaks.
3. When charging with a USB Type-C charging cable, the Bluetooth speaker function cannot be used.

Product parameters

Product name	Car portable air pump (Bluetooth speaker)
Product model	1108
Measurement range	3—150PSI
Temperature range	-20~70℃
Operating voltage	11.1V
Working power	90W

Product description

- 1 Inflatable tube
- 2 Digital display screen
- 3 Inflatable pump operation button
- 4 Bluetooth speaker control buttons
- 5 Type-C charging port
- 6 USB output port
- 7 Inflatable interface
- 8 LED light

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement

The device has been evaluatec to meel general RF exposure requirement. The device can be used in portable exposure condition without restriction.
