Multi-functional Wireless Charging Speaker
User Manual

Important Notice: For the best product experience, please be sure to use a 9V voltage adapter; using a non standard charger may cause the product to malfunction or even be damaged.

Product Overview

Operating steps

Product Introduction

This product can charge magnetic phones, while also allowing you to connect devices via Bluetooth to play music and choose your preferred lighting mode.

Applicable Models

Mobile Phone: iPhone 12 and later models support magnetic charging.

Product Specifications

Model: YP-2
Input: 9V $\pm$ 3A
Wireless charging power of the phone: 15W(MAX)/10W/7.5W/5W
Bluetooth speaker power: 3W
RGB light power: 2.5W
MaxInput Interface: Type-C Port
Transmission Distance (Phone): $\leq$ 8mm
Charging Efficiency: $>$ 75%
Product Dimensions: 105(L) x 66(W) x 125(H) mm

Packing list

Wireless charging speaker *1, Type-C fast charging cable *1, user manual *1

Precautions for wireless charging

- Before use, please confirm whether your phone supports wireless charging;
- Check if the phone is deviating from the wireless charging area on the charger;
- Use a non-metallic case when charging your phone;

- It is recommended that the case thickness does not exceed 4mm;
- It is suggested to stop running background apps while charging your phone;
- After the device is fully charged, remove it promptly and disconnect to avoid prolonged charging, which may cause continuous heating of the device and charger;
- When a metal object touches the charging area, the charger will automatically detect it and provide power-off protection;
- If the charger becomes too hot, protection will automatically activate. Please unplug the power first and wait until it returns to normal temperature before using the charger again.

Safety precautions

- Use indoors or in dry environments, and avoid placing it in high temperature, humid, strong static electricity, or strong magnetic field environments;
- For your safety, do not plug or unplug with wet hands;
- Keep out of reach of infants and young children;
- Do not use products that are wet or dirty;
- Unauthorized and unprofessional personnel should not open or repair.

FCC Statemen

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment. The device has been evaluated to meet general RF exposure requirement.

When powered by adapter, Bluetooth and wireless charging work:
To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
Single battery power supply, Bluetooth working:
The device has been evaluated to meet general RF exposure requirement. This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or conjunction with any other antenna or transmitter. The device can be used in portable exposure conditions without restriction.
