Ref: Modular Approval Request for Model 2BTAG B160-2029

FCC ID: 2BTAG B160-2029

Dear Sir or Madam,

The following attestation addresses the requirements to support modular approval:

Modular Approval Requirement	YES	NO
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	YES	
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal		
(c) The module must contain power supply regulation on the module	YES	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	YES *1	
(e) The module must demonstrate compliance in a stand-alone configuration	YES	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	YES	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	YES *2	
(h) The module must comply with RF exposure requirements	YES	

*1: A u.FL connector is permanently attached to the device. The integrator is to use a u.FL to SMA or N-type adaptor offering up the connection to the end user. Only antennas included in the integration guide/manual are to be used.

*2: The device is intended by professional OEM installation only as outlined in a separate attestation to the FCC. The integrator must follow the integration guide / manual, and limit the use of the equipment for the end-user.
