Ptessional Installation Declaration Letter

FCC ID: 2BTCSRV-C1000V10

To Whom It May Concern:

Regarding the use of standard SMA connectors, we declare that this device requires professional installation based on the following justifications:

- 1. Professional Installation Justification:** The hardware is a specialized component of a precision agricultural system and is not available to the average consumer through retail or mail-order channels.
- 2. Marketing:** The device is sold exclusively to authorized tractor dealers or professional installers for integration into agricultural machinery. It is not marketed to the general public.
- 3. Intended Use:** The intended use of the device is for industrial and commercial agricultural applications (e.g., automated steering and GPS guidance), not for general consumer use.
- 4. Complexity of Installation:** The equipment requires specialized installation by a professional. The antenna cable is routed inside a protective metal pole and integrated into the vehicle's chassis, making it inaccessible to the average user and requiring technical expertise for setup.

Sincerely,

A handwritten signature in blue ink, appearing to read "Hoonje Sung".
