USB cable x1 Various fish x4
User manual x1 Remote controller x1

Warning:

- Choking hazard—small parts. Not suitable for children under 6 years.
- This is an electrical device. Always unplug the USB power cable before adding water, moving the device, or performing any maintenance.

Bluetooth Music Aquarium Light

USER MANUAL

Note: The internal trace of moisture is caused by the final testing. Please feel free to use it.
The remote control does not include batteries. Two size-AA batteries are required.

Operation Steps

1. Open the container lid, pour water into the container without filling it completely, ensuring the water level remains 0.5 inches below the top.
2. The product must be placed on a flat surface to prevent liquid leakage from tipping over. Pay attention to electrical safety in the surrounding environment.
3. Remove the fake fish from the plastic bag and place it in water. The small fish needs to soak for about 2 hours before it can swim. Please wait patiently.
4. Connect the USB cable (please use a DC5V/2A or higher USB power adapter). After turning on the switch, bubbles will be generated at the bottom, and some fish will start swimming along with the bubbles.
4. The product features touch functionality, with the first button on the right: press lightly to turn on the power, press lightly again to pause/play, and press and hold to turn off the power. Button 2: press lightly to play the next song, press and hold to increase the volume. Button 3: press lightly to switch to the previous song, press and hold to decrease the volume. Button 4: press lightly to change the color, press and hold to switch modes (white noise and Bluetooth toggle).

Precautions

1. The product must be placed on a flat surface when viewing or operating.
2. Do not allow water or droplets to enter the product base or the DC output port outside the base. Do not attempt to separate the container from the base.
3. The operating voltage of the product is 5V. Do not use an adapter exceeding this voltage to avoid circuit damage.
4. When the current of the external power supply is less than 2A, please reduce the volume to avoid affecting product performance.

Maintenance and Care

1. Change the water approximately every two weeks, as it may become dirty. Use a soft brush to gently clean any dirt inside the tank.
2. After turning on, bubbles will be generated. The fish need to soak for about 2 hours before they can swim. Please be patient, as some fish may require up to 24 hours of soaking to swim.
3. To extend the motor's lifespan, avoid prolonged operation. Turn off the power when not in use.

Specifications

Product Name: Bluetooth Music Aquarium Light

Model Number: 8609A

Rated Voltage: DC5V/2A

Trumpet Maximum Power: 8W

Product Dimensions: 15*15*39CM

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

To maintain compliance with FCC'S RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
