Instructions for Use

Before the first use, please use the Type-C charging cable in the package combined with a 5V-1A or lower charger to charge the earphones for more than 30 minutes. After the earphones are fully charged, turn them on for use (it is recommended that the charging time should not exceed 2 hours).

- Does not support the use of mobile fast charging cables

Frequently Asked Questions

•Unable To Power On

The earphones are out of battery, please charge them first

•Unable To Charge

The fast charging head cannot charge, please use a portable power bank or a 1A regular charging head for charging

•Unable To Pair

Long press and hold the power button, the red and blue lights flash alternately, then release it. The phone will turn on Bluetooth to search for a new device, find the Bluetooth name T24 MAX device for matching, and if there are too many Bluetooth devices around, move to a different location and re match

•No Sound

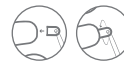

After successful pairing, if there is no sound from the earphones, you can adjust the volume button on your phone

•Switch Between Chinese And English

Turn off the Bluetooth switch on the phone, turn on the headphones, and when the red and blue lights of the headphones flash alternately, quickly and continuously tap the touch button. If you hear a Chinese or English prompt sound from the headphones, it means the switch is normal

Kind Reminder

Align the lanyard button with the headphone slot and place it in the correct direction. Twist it to complete the installation.

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
