

User Manual

一、 Product Overview

This magnetic wireless charging dock for watches operates via the USB universal interface and features a magnetic attachment design. It offers stable charging performance, and user-friendly operation, enabling quick charging for compatible watches.

1.1、 Product Parameters

-Interface type: USB

Charging method: Magnetic wireless induction charging

-Input specifications: 5V/1A

For Wireless Charging Part: Works in the 115KHz-205 KHz

Modulation type: ASK

Output :2.5W(Max)

Operating temperature: 0°C to 40°C

二、 Product Structure

-USB male connector: For connecting charging adapters, computer USB ports, and other power devices

Magnetic charging disc: Adsorbed to the charging area on the back of the watch for wireless charging

-Flexible cable: Easy to bend and store without strain, suitable for various placement scenarios

三、 Scope of Application

Applicable only to smartwatches with wireless charging for our company's products. Usage Steps

3.1、 Connect the USB port of the charging dock to compliant power sources such as a 5V/1A charging adapter, a computer USB port.

3.2、 Align the magnetic charging disc with the charging area on the back of the watch; the charging pad will automatically attach and conform.

3.3、 When the charging icon appears on the watch screen, it indicates that normal charging has begun.

3.4、 Once fully charged, simply remove the watch; the charging dock remains powered and ready for standby.

四、 Precautions

4.1、 This product is intended solely for charging our company's smartwatches. Do not use it to charge other devices or metal objects.

4.2、 During charging, ensure the charging disc is clean and free of stains and metal patches in contact with the watch to prevent charging interruption or abnormal heating.

4.3、 Do not bend or pull the connecting cable to prevent damage or short circuits.

4.4、 Do not use in humid, high-temperature, or strong magnetic field environments to prevent product damage or safety hazards.

4.5、 Non-professionals should not disassemble the charging dock. If a malfunction occurs, stop using it and contact after-sales service.

五、 Common Questions

-Charging failure: Check if the USB port is securely inserted and the power source is powered on; ensure the watch is properly attached to the charging dock; clean the charging contact surfaces.

-Intermittent charging: Remove any foreign objects between the watch and the charging dock; replace with a stable power supply device.

-Mild heating: Slight heating during charging is normal; if the temperature becomes excessively high and feels to the touch, immediately disconnect the power supply.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is Subject To the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and candidate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 20 cm surrounding the device and 20 cm above the top surface of the device must be respected.
