

Cooled Wireless Charger
User Manual

(Supports Qi2.2 magnetic charging)

Please read the instruction manual carefully before using the product.
Please keep this instruction manual safe for future reference.

Overview

- ① Wireless Charging Zone
- ② USB-C Charging Port
- ③ USB Charging Indicator
- ④ Heat Dissipation Holes
- ⑤ Cooled Air Inlet

Product Specifications Cooled Wireless Charger

Product Name	Cooled Wireless Charger
Model	PZ- MC006
Input	5V/3A 9V/3A 15V/3A (45W MAX)
Output	25W (MAX for regions outside Mainland China) 15W (MAX for Mainland China)
Charging Sensing Distance	Approximately 5mm
Operating Temperature	0°C - 35°F/32°F - 95°F
Compatible Models	iPhone 12 and above models Android models with wireless charging function
Package Contents	1 x Cooling Wireless Charger, 1 x Charging Cable, 1 x User Manual, 1 x Warranty Card

Device Connection

Use an adapter with an output of ≥45W, plug in the included 1.2m 45W white charging cable, and connect the other end to the PZ-MC006 Cooling Wireless Charger.

Attach the powered-on PZ-MC006 Cooling Wireless Charger to the wireless charging receiver of iPhone back to start charging.

Note: Charge sensing distance the distance between the internal sensing coil of cell phone and the wireless charger is 5mm, so please avoid bringing a thicker cell phone case.

Precautions

When using the wireless charge your phone, please don't obstruct the PZ-MC006's heat dissipation air intake and exhaust vents. This may cause the PZ-MC006 wireless charger to overheat, reducing product performance and posing other risks. Recommend horizontal charging with the phone placed vertically or horizontally.

Warning: Charging is not supported in the following two scenarios due to interference from metal/magnets/credit cards. Please remove them before charging.

Important Safety Instructions

1. This product is only suitable for iPhone 12 and above models, not for charging other brand products.
2. Please make sure your phone supports wireless charging, otherwise it will not be able to charge.
3. This wireless charger is not compatible with nonMagSafe cases . Do not use a case that is more than 2mm thick or it will not charge.
4. Do not place any foreign objects between your phone and the wireless charger's surface, including metalplates on a car mount, credit cards, keys, coins, metalobjects, or NFC cards, which will make wireless charging fail or cause overheating.
5. Do not disassemble, hit, crush or throw it into fire. Incorrect reassembly may result in fire or make a risk of injury.
6. Do not use this product under severe high temperature, humidity or corrosive conditions to avoid damaging the circuitry with leakage.
7. Do not spill water or other liquids on the wireless charger. If you need to clean it, please make sure the power is disconnected.
8. When charging, please keep the distance between theimplanted medical device (pacemaker, cochlear implant, etc.) and the wireless charger at least 20cm to avoid potential interference with the medical device.
9. When using a charger for power supply, please purchase or use a charger that has obtained certification and meets the standard requirements, Please use a single-port charger with output above 45W.

10. Use of power cords or chargers other than those recommended or sold by the manufacturer of this product may result in a risk of fire or personal injury.
11. Do not use an adapter with an output of 5V---1A (5W) or lower.
12. High temperatures can reduce charging speed and limit power, which is a common issue with all wireless chargers. It is recommended to charge your device in environments with temperatures below 25°C /77°F
13. The phone case and the position of your device on the wireless charger will affect the charging speed. The further the device is from the center of the wireless charger, the slower the charging speed will be.
14. For optimal charging performance, align your smartphone with the coil in the center of the wireless charger. If the charging icon does not appear on your smartphone, adjust its placement. Ensure the smartphone is always centered on the wireless charger.
15. During charging, this product may generate heat. This is normal, please do not worry. If overheating occurs, please stop using it temporarily.
16. Misuse, dropping, or excessive abrasion may cause product damage.
17. Do not use harmful chemicals or detergents to clean this product.
18. Please store this product in a cool and dry place, do not store this product in a hot or humid environment.
19. Keep this product out of reach of children.
20. Unplug the wireless charger if you don't plan to use it for a while. If you notice any visible damage, stop using both the charger and its power adapter immediately.
21. Never try to repair, alter, or take apart the wireless charger or its power supply yourself.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance, could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
