

Wireless Bluetooth Keyboard User Manual

model : BK030,BK031,BK032,BK033,BK034

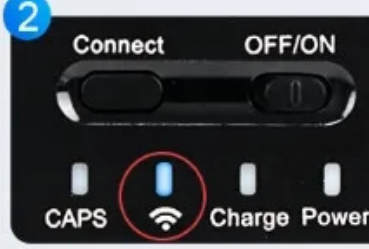

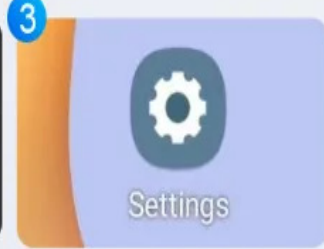

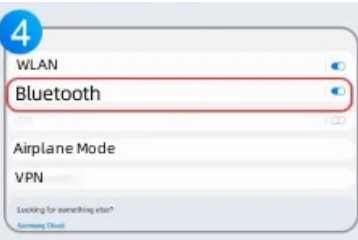

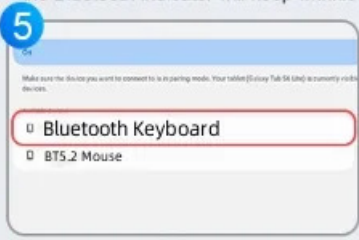

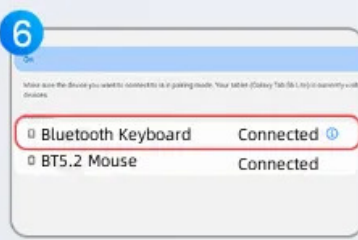

一、Keyboard Features

Welcome to choose this Bluetooth wireless keyboard. The keyboard adopts Bluetooth wireless connection and scissor-foot key structure, which will bring you a perfect input experience. Built-in polymer lithium battery, charging indicator light, can be charged and used repeatedly. Very low power consumption, with super long battery life.

二、Bluetooth Connection Instructions

Before using the wireless keyboard, you must pair it with your tablet device. Once connected successfully, you do not need to reconnect during future use.

Follow the diagram below to connect the keyboard to your tablet device.

- 1. To set the power button to "ON" position, the power indicator light will light up for 4 seconds and then go out.
- 2. Press the "Connect" button, the Bluetooth indicator light flashes continuously, and the keyboard Bluetooth is activated.
- 3. Tap the "Settings" icon on your tablet.
- 4. Tap "Bluetooth", and then turn on Bluetooth.
- 5. Select "Bluetooth Keyboard" on your tablet Bluetooth interface
- 6. Your tablet will connect automatically next time after successfully connecting

7. The keyboard is compatible with three operating systems (BT1:Android / BT2:Windows / BT3:IOS). You need to use a key combination to convert to the required operating system settings: press "Fn" and Q or W or E keys at the same time. The Bluetooth indicator flashes to indicate a successful conversion.

Fn+Q (Android system)
 Fn+W (Windows system)
 Fn+E (iOS system)

三、Indicator

Power LED: When the keyboard turns on, it flashes 3 seconds and then goes out automatically.

Charge LED: It flashes while charging and goes out once the battery is full.

BT LED: It flashes when the keyboard is connecting and goes out after connected.

CAPS LED: It flashes when switch to capital letters.

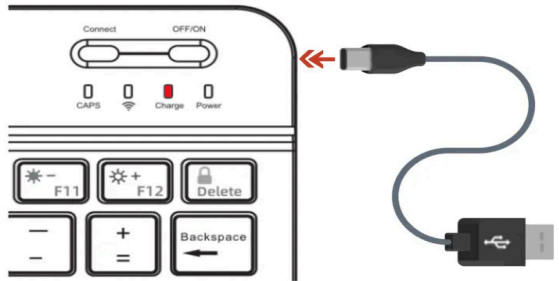

四、How to charge the keyboard

1. When using it for the first time, charge it for at least 6 hours before using. When the charge indicator light flashes, It means that the battery is low. In general, when the battery is low, charge it for at least 2 hours.

2. The charging indicator flashes red, indicating that the battery is low. Please charge it in time.

The charging indicator is always red, indicating that it is charging. When the keyboard is fully charged, the charging indicator goes out.

3. Connect the charging cable to the keyboard as shown in the right picture

五、How to adjust illumination

💡 x1 Press one time to turn on the light

💡 x2 At the second press, the color breathing mode will turn on

💡 x3 The third press will turn off the light

🔄 Press to change color

Troubleshooting

1. Make sure the power is turned on.
2. Make sure the wireless keyboard battery is charged.
3. Make sure the Bluetooth on the wireless keyboard is turned on.
4. Make sure the Bluetooth setting of the tablet is turned on.
5. Make sure the wireless keyboard and tablet Bluetooth are paired.
6. Make sure the wireless keyboard is converted to the required operating system.
7. Make sure the keyboard is within the operable distance of 10m.
8. If the keyboard cannot be paired with the tablet or after successful pairing, there is a typing delay or letters are typed continuously during text input, please follow the steps below:
 - Delete all Bluetooth devices in the tablet's Bluetooth options
 - Turn off the Bluetooth function option on the tablet
 - Restart the tablet
 - Connect the keyboard to the tablet again

Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

--Consult the dealer or an experienced radio/TV technician for help

NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

The device has been evaluated to meet general RF exposure requirement. The device

can be used in portable exposure condition without restriction.
