Attestation Letter

FCC: 2BU3E-SMSKV3

Dear IIA Labs:

The Scorched Ice 2BU3E-SMSKV3 has been configured (software and firmware) for a maximum RF output power of 17.5 dBm (0.056 W), as per the XF6-B001P4V2P1 Silicon Labs datasheet (v1.0.11 Aug 2025). The end user does not have access to increase the power nor can an access point increase the power above 17.5 dBm.

We are aware of the 22.4 dBm (0.1718 W) listed in the original XF6-B001P4V2P1 grant; however, cannot explain this discrepancy.

Sincerely,

Name: David Goulbourne

Title: RF Design Engineer
