

Declaration of Identical Hardware for Multiple Color Versions

For the submitted device, there exist multiple cosmetic color versions under the same model series.

The applicant hereby formally declares that all color versions are electrically, structurally, and RF identical. The only difference between different units is the outer shell color appearance.

There are no differences in PCB layout, circuit design, component BOM, antenna structure, firmware software, electrical parameters, RF performance, power consumption, or internal mechanical structure among all color variants. All functional and radio frequency characteristics remain completely consistent.

All compliance test data, technical specifications, block diagrams, schematics, and operational descriptions acquired from the tested sample are fully valid and applicable to all color versions of this model. No additional testing or documentation is required for different color variants.

This application represents one single unique model:LS-001, HVIN:LS-001. Color variations are purely cosmetic and do not constitute new models or different technical configurations.
