FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference that it may receive, including interference from authorized radio communication services. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Notes: This device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against interference in a residential installation. This equipment generates and uses radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause interference to another radio receiving device, you may need to take certain actions, such as reorienting or relocating the receiving device. You may also need to increase the distance between the equipment and the receiving device.

To reduce the chance of interference, you should follow the following guidelines:

- Do not use the same electrical circuit as the receiver.
- Increase the separation between the equipment and receiver.
- Plug the power cord of the equipment into a different wall outlet than that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
