

GOYO-1.0 User Manual

Number/Name	Description
1 Main unit	- USB Type-C charging port - 200 mAh Li-ion battery

Number/Name	Description
2 Charging Port	- USB Type-C charging port
3 On/Off Switch	- Power switch of the device
4 Pairing Button	- Button for initiating Bluetooth pairing
5 LED Display	- Indicates the status of the device

1. Batteries

Cautions!) Use a USB Type-C charging cable rated for 5 V output and equipped with an overcurrent protection circuit to charge. The device battery is a 3.7 V lithium-polymer cell with a capacity of 200 mAh.

Connect a charger with the correct output voltage to the device's USB Type-C port.

While the battery is charging, the LED display lights red, and the light turns off when charging is complete.

2. Registering Bluetooth pairing with the host device (first-time setup)

1. Turn the power switch ON.
2. Press and hold the pairing button for 3 seconds.
3. When the LED display flashes red and blue alternately, start pairing from the device you want to connect.
4. After the connection is established, confirm that the LED display blinks blue rapidly.

3. Bluetooth connection (reconnecting to a previously paired device)

1. Turn on Bluetooth on the previously paired device.
2. Turn the GOYO device's power switch ON.
3. Press the pairing button briefly (about 1~2 seconds). The LED display will blink rapidly a few times, and the device will automatically reconnect over Bluetooth.

How to Wear

1. After pairing, place the ear hook over your ear.
2. After attaching the microphone unit,
3. Put on the earphone.

Proper microphone placement: Secure the microphone unit on the area between the underside of your jaw and your Adam's apple.

FCC Compliance Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
