

CORNAV+ NAVIAGTION ANCHOR

- Introducing **CorNav+**, the next generation of Navigation Anchors—a cutting-edge solution designed to enhance indoor navigation across a wide range of environments. With a battery lifespan exceeding five years, **CorNav+** delivers long-term reliability and consistent performance.
- The device offers added flexibility through two battery configuration options and supports optional temperature sensor expansion for environmental and condition monitoring. Suitable for schools, shopping malls, hotels, hospitals, warehouses, and beyond, its durable design, adaptability, and advanced features improve operational efficiency and elevate the overall user experience.

10 years life span

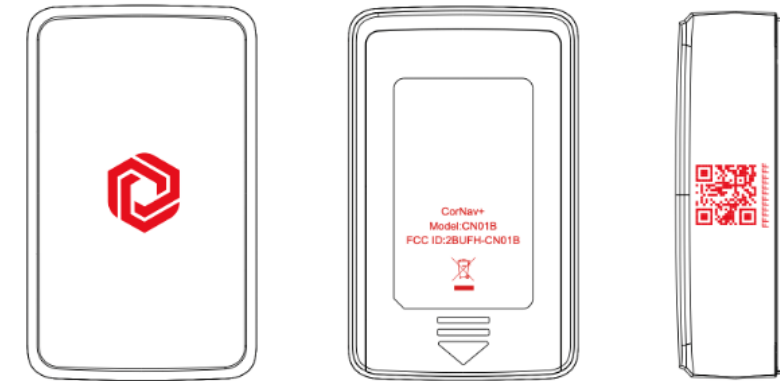

Flexible Installation options

Indoor Navigation across various environments

Supports Bluetooth long-range feature

Connectivity	BLE 5.1
Dimensions	73.8 x 46.3 x 26.5 mm
Color	Body: White
Installation	Screw with bracket Sticker
Transmission Range	150m in legacy mode 350m in Long range mode
Operating temperature	• -20°C/60°C (Li-SOCI2) • 0°C/40°C (Alkaline)
Lifespan (default settings)	• 10+ years (Li-SOCI2) • 5 years (Alkaline)
Battery capacity	• 5200mAh (Li-SOCI2) / 3200mAh (Alkaline) • Replaceable battery

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
