

Product Name: Mobile Selife Screen

EUT Constructional Details

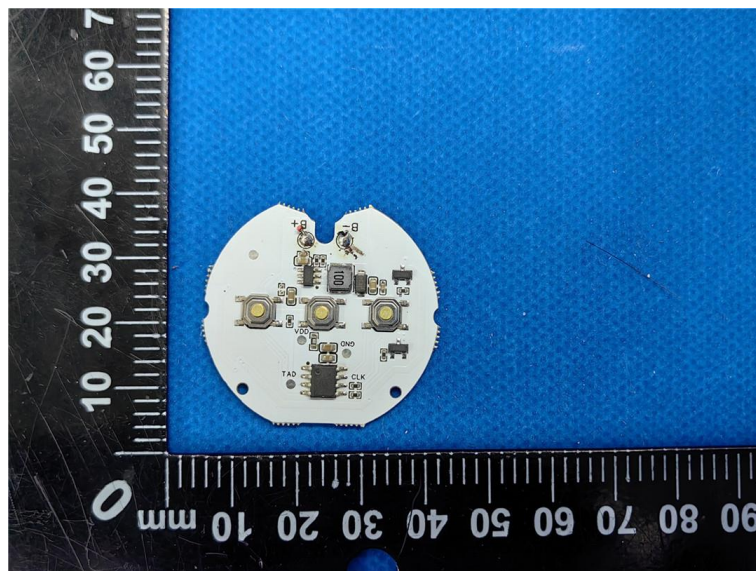

A photograph of a disassembled mobile phone, likely a Palm Treo 650, laid out on a blue surface next to a ruler for scale. The components shown include: a yellow battery with a label listing specifications and safety warnings; a green circuit board with various electronic components; a silver-colored display screen; a circular camera lens assembly; and a circular back cover with a grid of small holes. The ruler indicates the components are approximately 10-15 cm in length.
