- Product Model: T-MP03, PH06 PRO
- Output: 5W
- Input: DC 12V
- Operating Frequency: **WPC (110.5- 205K)**
- Product Appearance:

Operation Instructions :

1. After connecting to DC12V power, the button indicator light turns blue.
2. Place the phone on the charging plate to start wireless charging; the button indicator changes from blue to red.
3. To stop charging, press the button; the indicator light changes from red back to blue, and the power supply stops.

Precautions :

1. Foreign Object Detection (FOD): Detected metal or magnetic objects placed across the wireless charging plate.
2. Poor power contact resulting in high impedance, preventing the charging circuit from starting.
3. Please confirm the positive/negative poles and voltage before connecting to the power supply.

(Warning)

"For low-power radio frequency equipment that has obtained a verification certificate, without approval, companies, firms, or users are not allowed to change the frequency, increase the power, or change the characteristics and functions of the original design. The use of low-power radio frequency equipment shall not affect flight safety and interfere with legal communications; if interference is found, it should be stopped immediately and improved until no interference is found before continuing to use. The aforementioned legal communications refer to wireless communications operated in accordance with the provisions of the Telecommunications Management Act. Low-power radio frequency equipment must endure interference from legal communications or industrial, scientific, and medical radio wave radiation electrical equipment."

FCC Warning Statement"

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
