Click the Cam Switch button to switch dual cam and single cam.

A top-down view of the bottom of the device. The battery cover is a circular lid with a central latch. The latch is a small, rectangular button with a circular icon. A line points from the text 'Battery cover latch' to this icon.

The screenshot shows the 'Settings' app with 'Bluetooth' enabled. A hand icon is pointing at the 'MTK-CF08C' device, which is the target for pairing.

A diagram showing the bottom of the device with the battery cover removed. The cover has a '+' terminal on the right and a '-' terminal on the left. Below the cover, there are two circular icons: one with a '-' sign and one with a '+' sign, with lines pointing to the respective terminals on the battery cover.

The device has been evaluated to meet general RF exposure requirement.
The device can be used in portable exposure condition, compliance with exposure requirements.

-
- The diagram shows the top panel of the device, which is circular. It features a central oval-shaped button labeled "红色LED灯" (Red LED light). Surrounding this button are five circular buttons with symbols: a gear, a minus sign, a power button, a plus sign, and a circular arrow. Below the top panel, a USB cable is shown connected to the device. To the right, a digital display shows the output: "输出: 5V 2A".

A line drawing of the back of the device, showing a USB port and a DC IN port. A USB cable is connected to the USB port. The other end of the cable is connected to a laptop. A monitor is also shown next to the laptop.
