Gear (or Mode): Single-unit Switching

Operate for 1.5 seconds, pause for 200 seconds

Operate for 1.5 seconds, pause for 100 seconds

Operate for 1.5 seconds, pause for 60 seconds

Operate for 1.5 seconds, pause for 30 seconds

Bluetooth: Connection Status (Press any key to exit)

Timer: Single press to toggle

Timer for auto-shutdown after 1 hour

Timer for auto-shutdown after 4 hours

Timer for auto-shutdown after 8 hours

Timer for auto-shutdown after 24 hours

Cancel timer

Power On/Off: Press and hold

Light: Single press to toggle or turn off

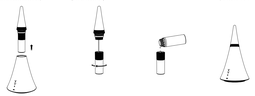
Addition & Replacement of Essential Oils

Step 1 Turn & lift diffuser head (counterclockwise)

Step 2 Rotate oil bottle off (clockwise)

Step 3 Fill bottle with oil

Step 4 Reattach head & power on



① Before adding essential oil again, the machine should be turned off and left to stand for more than 2 minutes. Only turn it back on after all the essential oil inside the atomizing head has flowed back into the essential oil bottle.
② It is recommended to control the amount of essential oil added each time to last within 45 days of use, so as to avoid essential oil deterioration caused by oxidation.
③ Before replacing essential oils of different fragrances, clean the essential oil bottle with alcohol and activate the "self-cleaning mode".
④ Please do not add water or other substances, as this may block the atomizing pipe and atomizing head, thereby affecting the atomization effect.

Prohibited Actions

Do not lay the product down or tilt its body

Do not directly drip essential oils into the spray outlet

Safety Instructions

① Do not use overloaded power outlets, damaged power cords, or adapters, as this may endanger your safety. If any are found, replace them promptly to avoid fire hazards.
② If you are not a technician, please do not attempt to modify, disassemble, or repair the equipment to prevent damage. If the equipment behaves abnormally, check whether it has been operated according to the normal usage requirements or follow the troubleshooting steps. If the issue cannot be resolved, contact the seller promptly.
③ When adding essential oils, do not drip them into the equipment. Do not invert or tilt the equipment during use. If the equipment needs to be transported to another location, perform maintenance and cleaning on the equipment first (see Equipment Maintenance for details) before packing it for transport to avoid damage from essential oil penetration.
④ Regularly maintain and clean the equipment to ensure it remains in optimal working condition.
⑤ Before discarding the appliance, the battery must be removed from it. When removing the battery, the appliance must be powered off, and the battery should be disposed of safely.

Equipment Maintenance

To ensure optimal fragrance diffusion, customers are advised to inspect and maintain the equipment every six months. Maintenance is also required when a new fragrance type needs to be used or when the fragrance diffusion effect weakens:
① Unscrew the used essential oil bottle.
② Pour an appropriate amount of alcohol into the essential oil bottle to clean it thoroughly.
③ After cleaning, pour a small amount of alcohol back into the bottle, reinstall it onto the equipment, and turn on the equipment to operate for 5-8 minutes.
④ After cleaning the equipment, turn off the power.

Equipment Fault Diagnosis & Maintenance Guide

* Before applying for factory return repair, please first diagnose and attempt to handle the issue yourself based on the following fault statuses, causes, and solutions.

Statuses	Causes	Solutions
Equipment Not Working	Machine not connected to power/ not turned on	Connect power and turn on the machine; check if the machine is in spray pause state (if there is a pause function, it needs to be deactivated).
	Machine in spray pause state.	/
Machine Not Spraying/ Spraying Less	Atomizing head clogged due to poor-quality essential oil	Clean the atomizing head with alcohol (self-cleaning mode)
	Atomizing head not installed properly causing oil leakage	Check and reinstall the atomizing head correctly
	Essential oil in the bottle exhausted	Check and add qualified essential oil in time
Oil Leakage	Air pump damaged or air delivery pipe damaged	Contact after-sales service
	Essential oil bottle damaged	
	Sealing ring inside the atomizing head damaged	
	Machine tilted or inverted	Restore the machine to its normal placement state
Abnormal Noise	Air pump loose or damaged	Contact after-sales service
Mini-Program Control Failure	Device not in Bluetooth mode/mobile phone Bluetooth not turned on	Re-bind the device
	Device not bound or bound to another account	Turn on mobile phone Bluetooth and reconnect

Notes:
If the fault cannot be resolved after the above diagnosis and handling, please contact after-sales service. Non-professionals are strictly prohibited from disassembling the machine; after disassembly, the "after-sales three guarantees service" will no longer be available.

Bluetooth App Control

How to smoothly use the app to control your diffuser?

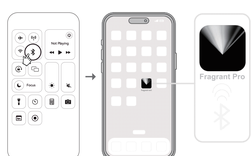
❶ Click to power on/off. ⏻
(the light turns white, and Bluetooth is activated)

❷ Scan the code to Download the App

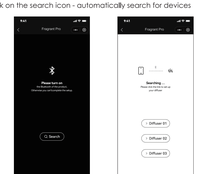
Fragrant Pro

Our app [Fragrant Pro] is available on the App Store. You can download it in the following ways:
1. Search for the app name in the app stores.
2. Scan the QR code attached to the diffuser.

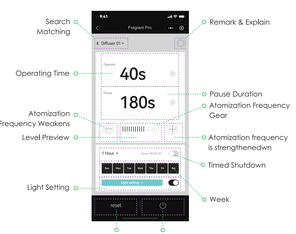
❸ Ensure Bluetooth is enabled on your phone.



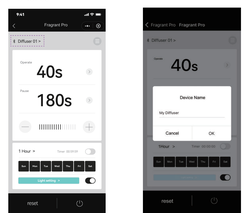
❹ Open APP (not connected)
Click on the search icon - automatically search for devices



❺ Introduction to the App Interface



❻ Rename Device



❼ Set and Save

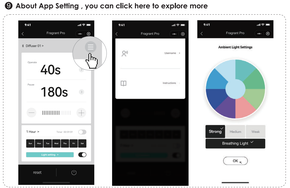
Operate Time: 15-180secs
Pause Time: 15-180secs
Timing: 1-24 hours
Schedule: Sunday to Saturday

Pressing any physical button will exit the APP mode.

Kindly Note:

- Atomization Frequency Control
  · The atomization frequency can be manually adjusted by setting the operating time (Operate) and pause time (Pause) to control fragrance concentration.
  · Alternatively, use the preset time shortcuts (-) and (+) for quick adjustments.
- Powering Off
  · To power off during operation, click the "Power Off" button in the app.
  · Alternatively, press the physical button to turn off the device.
- To enable the Timing Mode, you must disable all scheduled periods within the "Sunday to Monday" cycle.

❽ About App Setting , you can click here to explore more



This app is compatible with various aromatherapy diffuser models from our brand. If you've bought multiple diffusers, you can assign a unique name to each one to prevent confusion during use. For instance, you can name them based on where they are placed (e.g., living room, bedroom, etc.) or differentiate them by shape or color.
Lastly, if you have any suggestions or feedback regarding our app, please don't hesitate to get in touch with us at any time.

⚠ WARNING

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception (which can be determined by turning the equipment off and on), the user is encouraged to try to correct the interference by one or more of the following measures:

· Reorient or relocate the receiving antenna.
· Increase the separation between the equipment and receiver.
· Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
· Consult the dealer or an experienced radio/TV technician for help.
FCC Radiation Exposure Statement: The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.
