Inquiry on 08/13/2026 :

Inquiry:

Good day,

I have a question regarding a pre-certified single-radio module.

If the end user uses a lower-gain antenna of the same type due to the unavailability of the originally certified antenna, would the end user need to submit change ID and C2PC (permissive change) before incorporate the module (with the new antenna) into a host product?

Thank you,

FCC response on 08/17/2026

In principle no, but the integrator must spot-check test to determine if the C2PC is required.

Thank you
