Users Manual V1

ECHO

Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction

Package Contents

01

Installation steps

Fix by clips

- 1 Pull the steel clip a little wider and insert it directly into the left edge of the helmet
- 2 Lift the felt lining corresponding to the hook of the inner cavity speaker at the ear position of the helmet, and attach hook and loop fasteners
- 3 Attach the hook side of the loudspeaker to the corresponding loop side properly. (Attach the short - wire loudspeaker to the left side)
- 4 Stick the butterfly - shaped sticky board in the appropriate position on the left side of the helmet, and place the microphone corresponding to the position of the mouth (arrange the wires and the inner lining properly)
- 5 Insert the plug into the headphone jack
- 6 Installation completed
