ATTN.: Reviewing Engineer

FCC ID: 2BUSOM-Bot-2450

The shield can holes of this device are designed to assist heat dissipation. In addition, since the device operates in the 2.4 GHz band, the wavelength is approximately 125 mm. Because the shield can hole size is 2 mm, which is much smaller than the operating wavelength, it can be considered to maintain effective RF shielding.

Sincerely,

A handwritten signature in black ink, appearing to be 'Vin, Yu', written over a light gray rectangular background.
