Host Label Permanence Attestation

Class II Permissive Change

Date: 03/25/2026

To Whom It May Concern:

Angel Aerial Systems hereby confirms that the host product labels for both the Drone and Ground Controller Station will be a permanent, non-paper label.

The host label will be fabricated from a durable, weather-resistant synthetic nameplate material and will be permanently affixed directly to the equipment enclosure using permanent adhesive. The label is intended to remain legible and securely attached for the expected lifetime of the equipment under normal operating and handling conditions. The host label is not a paper stick-on type label.

Accordingly, the host label complies with the permanence requirement referenced in KDB 784748 D01, Section 3, and is consistent with the FCC equipment labeling requirements for permanently affixed labels.

Sincerely,

Signature: *William Hasting*
