Subject; **Modular Transmitter Application**

Company name: RFOXiA (Registered in Delaware USA)
FCC ID: 2BUYBMULTINAV

Dear Sir/Madam,

This letter includes the FCC application requirements for Modular Transmitter Approval Request for;-

FCC KDB 996369 D01 'Module Certification Guide v02; and
FCC KDB 996369 D03 OEM Manual v01

In accordance with 47CFR 15.212 Modular Transmitters and KDB 996369 D01 'Module Equip Auth Guide v02'. FCC ID : 2BUYBMULTINAV has been examined against the following requirements.

Requirement per 15.212 and KDB 996369 D01	Explanation from Grantee (do not write yes/no, but explain why product complies/how it is achieved)
The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly.	The radio elements must have the radio frequency circuitry shielded, refer the EUT photos document.
The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.	The module have specifically incorporated buffered modulation/data inputs into the module design, ensures that signals are properly processed and buffered before entering the device, thereby avoiding compliance issues caused by unstable signals or interference.
The module must contain power supply regulation on the module.	Power regulation integrated inside the module
The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b).	The module must contain a permanently attached antenna, refer the EUT photos document.

The module must demonstrate compliance in a stand-alone configuration.	refer the test report:MAX26010175P01-R01.
The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (see KDB Publication 784748).	The module labeled FCC ID:2BUYBMULTINAV on its shield. See label document.
The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee.	The module comply with all specific rules, such as transmitter power, frequency, modulation method and signal quality.
The module must comply with RF exposure requirements	Accrediting the test report:MAX26010175P01-R01. The module comply with RF exposure.

Integration Instructions for host product manufacturers

The following items are submitted in support of application for Modular Transmitter FCC ID as noted above as required by the FCC KDB 996369 D03 OEM Manual v01.

These items are provided as integration instructions for host product manufacturers (e.g., OEM instruction manual) to use when integrating a module in a host product.

Any requirements that are not applicable to the Module are as indicated below.

Summary of requirements and Checklist. Refer to the KDB for description of the complete requirements;

KDB Ref Sect	Requirements of KDB 996369 D03	User Manual Page Number reference
2.2	List of applicable FCC rules	Page 20
2.3	Summarize the specific operational use conditions	Page 20
2.4	Limited module procedures	Page 20
2.5	Trace antenna designs	Page 20
2.6	RF exposure considerations	Page 20
2.7	Antennas	Page 20
2.8	Label and compliance information	Page 20
2.9	Information on test modes and additional testing requirements	Page 21
2.10	Additional testing, Part 15 Subpart B disclaimer	Page 21
