The device also supports the "AP hotspot connection". Please ensure the device has been reset.

1. Click "+" in the upper right corner, swipe up the bottom and select "Wi-Fi Camera" - "AP hotspot connection".

2. Select the Wi-Fi that the device needs to connect to, and enter the correct password.

(For iOS, if you want to connect to other Wi-Fi, please connect your mobile phone to the Wi-Fi you need and then return to the APP to refresh)

3. Connect to the hotspot of the device based on APP instructions.

Note: You can find the corresponding ID on the device body tag which is for the hotspot's name.

* Adding completed* is on page 13

Adding completed

After the camera prompts "Network connected" - "Bind successfully, camera ready", you can create a group for the camera and set the name.

Add camera

After the camera is successfully networked, it will appear online and you can create a group for the camera and set the name.

Cloud service

You can enjoy these special functions after subscribing the cloud service on the [Cloud] interface of the V380 Pro APP.

* Cloud service is a value-added service that requires payment.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement
To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
