

Smart Pet Feeder AL04-W User Manual

If the product is upgraded in the following please refer to the actual product in hand.

Safety Instructions

Please do not use wet, canned or moist food.

This product uses 3 × D Cell Batteries as a backup power supply. Please use double power supply to ensure the normal use of the product.

Examine the feeder after installation. Do not plug in if there is water on the power cable or plug.

Do not immerse the base part in water at any time as it may damage electronic components.

Do not disassemble the feeder other than as instructed in this user manual.

Only use accessories recommended or sold by the manufacturer. The use of accessories not recommended or sold by the manufacturer may cause an unsafe condition.

Dispose of all packaging materials properly. Some items may be packed in plastic bags, these bags could cause suffocation.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
