Mounting Sequence

(1) **Installation of grain drum bottom**
Please put the bottom of the grain barrel into the base of the main unit correctly as shown in the illustration.

(2) **Installation of grain drums**
① Pay attention to the large (L) and small (S) alignment parts, and place them in the corresponding serial number position of the main unit.
② Put the bucket into the corresponding buckle track according to the illustration, align with the mark, and rotate clockwise from (1) to (2) until you hear a click and listen it, and then make sure the feeding is not blocked after the operation is completed.

(3) **Installation of the food tank lid**
Pick up the lid with both hands, align it downwards with the handle of the grain barrel, and press down firmly to complete the task.

(4) Place the feeder base on a level surface with the food bowl stuck to the base.

- In the unlocked state, press and hold for 6 seconds to make a "di" sound, and the device will restore the factory settings, network information, feeding schedule, feeding records, etc.
- The network can be reconfigured after reset.

Smart Life APP Specific Operations

Simple Troubleshooting

Programs for problem solving

- App can't be displayed properly**
A. Please make sure that the environment where the device is located has a good network.
- The App can't connect to the feeder**
A. Please check if the Wi-Fi name and password are in Chinese or longer than 12 digits, and make sure the Wi-Fi type is 2.4G.
B. Please restart your phone, close the non-system software that starts automatically on boot, turn on the Bluetooth and positioning of your phone, and try to reconnect again.
- The feeder does not dispense food properly or does not dispense food at all**
A. Please check if there is too much grain in the food bowl or if it causes blockage of the grain passage. If so, please clean the grain passage and the grain outlet in time, when using battery power, please check if the battery is dead and if the battery is leaking.
B. Please check whether the distance of the feeder from your home router is more than 10 meters (effective distance of 10 meters); try not to separate walls in the middle, according to the characteristics of Wi-Fi, the Wi-Fi signal across the wall will drop sharply, and the connection appears to be unstable, which will lead to the device offline.
- No response to power on**
A. Please make sure the power is plugged in. If the check is correct and the device still does not power on normally, please contact your dealer or customer service in time.

Cleaning Instructions

Follow the steps to create a cleaning chart

- Remove the bottom of the grain barrel
- Rinse in water or with food-grade detergent and air dry
- Grasp the grain barrel by hand, hold the base and rotate it counterclockwise to remove the barrel
- Release empty the food tray and remove the food tray
- The base of the main unit can be wiped with a damp towel, do not rinse with water

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
