

Smart password padlock

User Manual

01

I Product Specifications

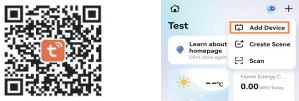

- Lock opening methods: password / Bluetooth (Tuya APP)
- Password length: 6 to 8 digits (0-9)
- Storage capacity: 100 groups of password
- Waterproof rating : IPX5
- Standby time: 10 months
- Battery level reminder: Red flashing after unlocking indicates low battery.
- Battery type: 2 CR2032 button batteries
- Operating temperature: -20 °C to 55 °C
- Product material: Zinc alloy lock body + A3 steel shackle

II Instruction for Use

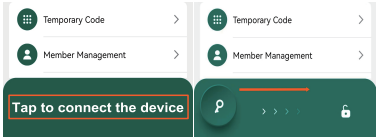

- The factory initial password is 123456. Enter the password and then press the "Unlock" key at the lower right corner to unlock. If you enter the wrong password, press the "Cancel" key at the lower left corner and re-enter the password.
- To add a new password, you need to download the TUYA APP, register a new password, and the default password will automatically become invalid.

02

- 1- Download**
Tuya APP from the app store or scan the QR code below to download the TuyaAPP.
- 2-Turn on the Bluetooth function of your mobile phone**
Open the application and log in. To grant the app access to Bluetooth, go to the "My" page, then click on the "Settings" icon in the upper right corner, and select "Privacy Settings" to open the permissions.
- 3-Add Device**
Press any key on the padlock to wake it up. Then, click "Add Device" to add your padlock to the application.
- Note: The padlock can only be bound to one Tuya account. If you change your phone, please make sure to log in with the same Tuya account; otherwise, you won't be able to connect to the device.

- 4 - Unlocking Smart Padlock**
On the main page of the smart padlock app, swipe the key icon from left to right at the bottom until it aligns with the lock icon to unlock.
- If the Bluetooth connection is interrupted, press any key to wake up the device, and then click "Click to Connect".

03

5. Add password

Please click on "Member Management", then select "Me", and click "Add".

8 - Unbind the APP

Click the "✖" at the top right corner of the interface to enter the settings page Then click "Remove Device " and select "Remove and Clear Data".

9. Replace battery

When the lock is opened by entering the password, if the red light flashes continuously, it indicates that the battery is low. The lock can still operate for about one month or approximately 100 times of unlocking. Abnormalities may occur when the battery is low. Please replace the battery as soon as possible. Use a small screwdriver to unscrew the bottom screws, remove the battery compartment, replace it with a new battery, and then screw the battery compartment back on.

Note: When installing the two batteries, align them in the same direction. The negative end with the small protrusion should correspond to the recessed side of the battery compartment.

05

III Battery Disposal

Note: Battery Safety and Disposal

Please dispose of used batteries immediately. Keep both new and used batteries out of the reach of children. If you suspect that someone has swallowed a battery or inserted it into any part of the body, seek medical attention immediately. If the battery compartment cannot be closed securely, stop using the product and keep it away from children.

This product contains a battery and should not be treated as ordinary household waste. It must be recycled. Please take it to the nearest recycling area.

Batteries contain substances that may be harmful to the environment and human health. Please keep them out of the reach of children. If swallowed by mistake, seek medical attention immediately.

⚠ Battery Warning

Keep the battery out of the reach of children.

Swallowing batteries can cause chemical burns, perforation of soft tissues, and even death.

Severe burns may occur within two hours of ingestion. Seek medical attention immediately.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
