

User Manual

WL-MODEL1

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The product is used in 2-function high-power driving equipment, such as automobile winch, rolling shutter door, etc. The remote controller uses 433.92mhz frequency to transmit signals, the power supply is powered by DC12V (23a 12V) battery, and the corresponding 433.92mhz receiver receives remote control signals. The remote controller adopts independent coding rules, which can be effectively different from other products and will not produce the same code interference.

Remote control components:

1. Power switch
2. In function key
3. Out function key
4. Battery location
5. Indicator light

instructions:

A. Turn on the power switch 1, the indicator light is always on. B. press the function key 2, the indicator light flashes and the function is normal. C. press the function switch 3, the indicator light flashes and the function is normal. After use, press power switch 1 again to turn off the power. If the remote control is not used for 2 minutes, the system will automatically turn off the power.

FCC Caution.

(1)§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Changes or modification warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of

the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning for Portable device:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

According to §15.247(e)(i) and §1.1307(b)(1), systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess of the Commission's guidelines.
