

Project No.: TM-2605000065P
Report No.: TMWK2605002042KS

FCC ID: 2BVYY-C2-317-003

Page: 1 / 1
Rev.: 00

According to 447498 D04 Interim General RF Exposure Guidance v01 section 2.1.2, the available maximum time-average power not exceeding 1 mW is exempt from the test.

Max. Average Electric Field: 76.34 dB μ V/m@3m
Max. Average EIRP power: -18.89 dBm

Antenna gain: -0.66 dBi.
Max. Average power: -18.89 - (-0.66) = -18.23 dBm
Max. Tune-up power: -18 dBm = 0.02 mW

This product is exempt from testing because its maximum time-averaged power does not exceed 1 mW.

Note:

The Max. tune-up power is determined based on the average electric field strength reported in test report TMTN2605000431NR for the purpose of test exclusion.
