

Instruction Manual

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Receiver (RX)

Charging Case (CC)

How to use

Step 1: Plug RX into your phone's charging port. It powers on automatically and enters pairing mode (RX Indicator Light flashes green).

Note to Android users: If your phone fails to detect the receiver, enable the OTG Connection function in your system settings.

Step 2: Press and hold the TX Power Button for 2 seconds to power on (TX Indicator Light flashes).

Step 3: TX and RX are factory pre-paired and auto-connect wirelessly after power-on. When connected, both lights stop flashing and stay solid. Open your camera, live stream app, or audio app to start using it.

Function & LED Status

Microphone(TX)

Function	Microphone (TX)- Operation & LED Status
Power on	Remove from charging case or long-press the function key for 3 s: blue indicator flashes.
Power off	Place into charging case or long-press the function key for 3 s: indicator turns off.
Pairing (unconnected)	TX Indicator Light flashes blue.
Connected	TX Indicator Light turns solid blue.
AI Noise Reduction	AI noise reduction is enabled by default upon power-on.
Original Sound	Single-tap the function key to enable; pink light effect activates. Tap again to exit.
Mute Toggle	Double-tap the function key to enable; red light breathes and flashes. Double-tap again to exit.
Charging	Red indicator stays solid on; indicator turns off when fully charged.

Receiver (RX)

Function	Receiver (RX)- Operation & LED Status
Power Control	RX powers on automatically when plugged into a device; powers off when unplugged. It is powered by the connected device.
Pairing (unconnected)	RX Indicator Light flashes green.
Connected	When 1 TX unit is connected, RX indicator 1 turns solid green. When 2 TX units are connected, RX indicator 2 turns solid green.
Charging	RX has no internal battery and does not require charging. Port ⑨ supports pass-through charging for connected smartphones.
