

MODELS DIFFERENCE DECLARATION

(Color Variants of Identical Hardware)

Date: 7 April 2026

Issuer: SUPERARK LTD

We, SUPERARK LTD, hereby declare that the product models listed below are identical in all aspects of hardware design, electronic components, printed circuit board (PCB) layout, firmware, radio frequency (RF) characteristics, and mechanical construction. All models are based on the same base design (TC01). The model numbers TC02 and TC03 are used internally to differentiate target end-customer devices. The only difference between models with a color suffix is the external color (colorway) of the device enclosure.

- Specifically, we confirm the following:
1. All listed models share the same internal electronic design, including identical PCB, chipset, antenna, battery, and all other components.

2. All listed models run the same firmware and software.

3. The mechanical dimensions, shape, and housing material of all listed models are identical.

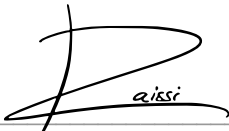

4. The sole difference between models is the external color finish of the enclosure, which has no impact on EMC, RF performance, electrical safety, or any other technical characteristic.

5. The model naming convention uses a suffix after the dash to denote the colorway (e.g., "-W" for White, "-C" for Multi-color). Models without a suffix represent the default colorway (Black).

Model Overview

Model No.	Colorway	Difference
TC01	Black (default)	Color only
TC01-W	White	Color only
TC01-C	Multi-color	Color only
TC02	Black (default)	Color only
TC02-W	White	Color only
TC02-C	Multi-color	Color only
TC03	Black (default)	Color only
TC03-W	White	Color only
TC03-C	Multi-color	Color only

This declaration is issued under the sole responsibility of SUPERARK LTD. We confirm that test results obtained from any one of the base models (TC01, TC02, TC03) are fully representative of, and applicable to, all color variants listed above.
