

Dongguan Yaxu (AiT) Technology Limited
No.22, Jinqianling 3rd Street, Jitigang,
Huangjiang, Dongguan, Guangdong, China.

A collection of various small electronic components and tools, including two screwdrivers, a USB cable, a small clear tube, a white cap, a small black tool, and several small blue and white components, all laid out on a blue surface next to a ruler.

A photograph of various items laid out on a blue textured surface. On the left, a black ruler with white markings in centimeters and millimeters is visible. In the center-left, there are five dental extraction tools with different colored handles: white, black, dark grey, light green, and black. To the right of these tools are several small, light blue, cone-shaped objects. Further right, there are two black, curved objects, possibly dental dams or separators. Below these, there are several thin, black, rod-like objects, some with small loops or hooks at the end. To the right of these rods is a black, curved object with a textured surface. Below that, there are several small, light blue, rectangular pills. At the bottom center, there is a white USB cable with a black USB-A connector and a black USB-C connector. To the right of the cable is a clear plastic container and a small white circular object.
