V 12.0 Alarm Clock User Manual For Android users: Scan to download. For iOS users: Scan to download.	Screen Display	Button	Charging Method The alarm clock is equipped with a built-in lithium battery. Please use a DC 5V $\pm$ 1A adapter for charging. When the battery level is low, the " " icon will flash as a reminder to charge. While charging, the " " icon will flash in a dynamic cycle. Once fully charged, the " " icon will remain steadily lit. Tips: We recommend using the alarm clock while plugged in, especially when using the white noise and night light features for extended periods.	How It Works Sleep Training Instructions Yellow Light: Simulates morning light to gently wake the child. Green light: Indicates wake-up time, stays on for 1 hour. Provides a clear visual cue for getting up. Red light: Indicates bedtime, accompanied by 30 minutes of white noise to create a sleep-friendly atmosphere. Visual Alarm Clock: Allows the volume to be set to level 0, activating only the light without sound. Sun and Moon Icon Function Sun icon (07:00-18:59): Indicates daytime. Moon icon (19:00-06:59): Indicates nighttime. The intuitive icons help children understand day and night transitions.	Time Setting Power Switch Press and hold the " " button to power on/off. 1.Press and hold the " " button to enter time settings. "24H" flashes Adjust with " " / " ", confirm with " " proceed to the next step. 2."Hour" flashes Adjust with " " / " ", confirm with " " proceed to the next step. 3."Minute" flashes Adjust with " " / " ", confirm with " " proceed to the next step.
