Before First Use

Note:
Before using the light,
make sure the slide switch
on the lamp itself is turned on.

Note:
Before using the wireless switch,
make sure the slide switch on the
back is set to ON.

**If the light doesn't turn on, check that both the
lamp's switch and the back slide switch are ON.**

Touch Control

Short Press: Select Color Temperature

Long Press: Adjusts the brightness

Touch After 5s Delay: Enter standby mode
(Next touch resumes previous state.)

Wireless Switch

ON button: Turn On & Select color temperatures

OFF button: Turn Off

Easy Installation

• Wireless Switch

① Adhesion – Peel the film and
stick the base to the wall.

② Attach – Hang the
switch on the base.

• Light

① Remove the white film
from the adhesive side of
the metal plate.

② Press the plate firmly onto
a clean, desired location, then
attach the light magnetically.

Warm Tips: Magnetic installation is easier and more convenient, but if the wall skin
is easy to fall off or the wall is not flat, please choose the sturdy drilling installation.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement

The device has been evaluatec to meel general RF exposure requirement. The device can be used in portable exposure condition without restriction.
