Names and Content of Hazardous Substances in the Product

Component Name	Harmful substances					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent chromium (Cr(VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)
Printed circuit components	○	○	○	○	○	○
Small structural parts such as the casing	○	○	○	○	○	○
This form is compiled in accordance with the provisions of SJ/T11364. ○: Indicates that the content of this harmful substance in all homogeneous materials of this component is below the limit requirements stipulated in GB/T26572 ×: Indicates that the content of this harmful substance in at least one homogeneous material of this component exceeds the limit requirements stipulated in GB/T26572 For the components marked with "X" in the form, the substitution of harmful substances is impossible due to the limitations of global technological development levels. Printed circuit board assembly*: This includes printed circuit boards and their components, electronic components, etc. Depending on the product model, the product you purchase may not contain all of the above components. In the People's Republic of China, the symbols "Environmental Protection Use Period" (EPUP) will be printed on electrical and electronic products for sale. The numbers within the circles represent the normal environmental protection service life of the products.						

FCC Warning

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates,uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, maycause harmful interference to radio communications. However, there is no guarantee thatinterference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
