

## FCC COVER LETTER

**Date:** June 23, 2026

**To:** Telecommunication Certification Body (TCB)

**Subject:** FCC Equipment Authorization Application – System Approval **FCC ID:**  
2BWE8-NPICONNECT

Dear Reviewer,

This application is submitted for **system approval** of a device incorporating a **13.56 MHz RFID transmitter operating under FCC Part 15.225**. The host product integrates the following **pre-approved radio module**:

- **[FCC ID #MCQ-CCIMX6UL] — [Radio Type, Wi-Fi, 2.4GHz & 5GHz]**

These modules are used without modification and operate strictly within the conditions of their existing FCC grants.

For this filing, **the only test report submitted is the 13.56 MHz RFID (Part 15.225) test report**. A comprehensive **RF exposure evaluation** is included and addresses **all integrated radio modules**, including the RFID transmitter, to demonstrate compliance with FCC RF exposure requirements.

No additional Part 15 test reports (e.g., Wi-Fi, BLE, or other module-specific reports) are included in this application, as those radios are already certified under their respective FCC IDs.

We respectfully request FCC authorization for this system under the referenced FCC ID.

Sincerely,

**Michael Sakla**
