2. Use the APP software OneGlance

You can set the working mode of the glasses, control their operation, and use other related functions through the APP. For details, login to the APP and refer to the user guide.

(VI) Tips

- The product supports photo taking and video recording, but when the battery level is below 25%, the device will disable the photo taking and video recording functions and suspend data transmission to the mobile phone. Use can be resumed after charging or replacing the battery..

- This product supports WiFi data transmission to and storage on the mobile phone, which requires the mobile phone to grant the relevant permissions to the APP.
- The smart glasses are a stand-alone device and many functions need to be used after connecting to a mobile phone.

(VII) Important Safety Warnings

Please read this user manual carefully before using the product and keep it properly for future reference.

- This product is not resistant to water vapor. Do not use or charge it in high-humidity environments such as bathing/showering/sauna.
- Please use the dedicated charging cable provided with this product for charging.
- If you feel abnormal temperature on the device while charging with it worn, please remove it immediately and stop using it.
- If the device overheats or becomes unresponsive when not worn, please disconnect the charging cable in a timely manner to avoid device damage.
- To prevent potential hearing damage, do not use high volume for a long time.
- Do not use this product during strenuous exercise to avoid personal injury caused by accidents.
- This product supports photo taking and video recording functions. When using this product, please abide by the privacy protection principles, avoid recording audio/videos or taking photos of others without permission to prevent infringement of privacy rights. Please understand and comply with local regulations before use and ensure compliance with local legal requirements to avoid unauthorized use.

(VIII) Disclaimer

The illustrations of products, accessories, user interfaces, etc. in this user manual are only schematic diagrams for reference and may differ slightly from the actual product. Please refer to the actual product.

Due to product upgrades, some display contents or functions of the product you receive may differ from those described in this manual. Please refer to the actual product.

Due to product upgrades, necessary changes may be made to printing errors and inaccurate information in this manual at any time, or improvements may be made to the programs/devices without prior notice; such changes will be incorporated into the new versions of this manual.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
