

Star-rated 4WD Climbing Off-road Amphibious Car Manual

Get to Know Your Remote Control

Installing Batteries and Pairing the Remote Control

The remote control uses 2x1.5V AAA batteries (batteries not included)

Pairing Instructions:
Turn on the remote's power switch. At this time, the light will flash. Turn on the car's power switch. The remote's light will go out, indicating that pairing is complete.
Note: The car cannot pair with both the remote control and watch simultaneously. The watch needs to be turned off when pairing with the remote control.

Caution: If not in use for an extended period, please remove the batteries.

Watch Remote Control (sold separately)

The watch uses 2x1.5V AAA batteries (batteries not included)

Caution: If not in use for an extended period, please remove the batteries.

Pairing Instructions for Watch:
When the watch is turned on and not paired, the light will flash rapidly. After successful pairing, the light will stay on. When approaching the maximum distance, the light will flash slowly. When the car's battery is low, the watch's light will flash twice and pause once.
Note: The car cannot pair with both the remote control and watch simultaneously. The remote control needs to be turned off when pairing with the watch.

Operating with the Watch Remote Control

Installing Batteries for the RC Car

RC Car (with battery included)

Caution: After playing in the water, please dry the car and battery.

Accessories:

1. USB Charging Cable
2. Rechargeable Battery Pack (included)

Caution: If not in use for an extended period, please remove the batteries.

USB Charging Instructions

1. The battery pack must be fully charged before first use to ensure adequate power. Long-term non-use will lead to automatic discharge, and overcharging will shorten battery life.
2. Users should regularly inspect wires, plugs, shells, and related components. If damage is found, stop using until repaired.
3. Do not connect the toy to unauthorized power sources. Charging conditions: Connect the USB smart charging cable to the original battery.
4. It is recommended to use a suitable adapter for charging. Do not use a fast charger.
5. Please use the correct adapter for charging. Input: 100-240V~50/60Hz 0.2A; Output: 5.0V---500mA 0.5-1.5A.
6. Charging Instructions: Connect the rechargeable battery to the smart USB charging cable, which can charge the battery by connecting to a power source with a USB port, such as a desktop computer, laptop, power bank, USB power socket, or through a USB adapter.
7. If the RC car is not in use for an extended period, please remove the batteries from both the car and remote control.

Operating with the Remote Control

Low Battery Warning: When the car's battery is running low, the remote's light will flash twice and pause once. Please end water play as soon as possible.

Battery Storage Methods

- ① When storing lithium batteries, do not fully charge them to avoid long-term storage causing battery passivation, which accelerates self-discharge.
- ② Store lithium batteries in a dry indoor space with a temperature between 10°C and 32°C.
- ③ Perform a charge-discharge cycle every 3 months to maintain their activity and restore performance.

*Please read the manual carefully before operation and keep it for future reference.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
