Justification for Re-Use of Radio Test results

We, Intellobots Technologies Pvt Ltd, consider that the conducted signal test data from original wireless module test report BTF260402R00401, provided for ISC-nRF54L Series Module, model ISC-nRF54L15-A (INDIESEMIC PRIVATE LIMITED) and approved on 2026-04-29 (FCC ID: 2BVP2-NRF54L15), along with the subsequent system level test reports IN262KZI 001 (Electronic Shelf Label, Model TXES26B4CBLA), can be leveraged based on following rationale:

1. Applicant has integrated radio module according to the integration guidelines of module
2. No changes have been made on radio module
3. Re-test the output power for spot check verification, Radiated spurious emission and re-evaluated RF exposure assessment.
