- Intelligent speaker voice control
- Remote control of mobile app

LCD high definition screen
Tempered glass surface
AE-6603-K | AE-6603-K-WIFI

1.Product Introduction

AE series intelligent controller. It is widely used in families, residential buildings, schools, hotels, hospitals, offices and other environments to achieve ideal room temperature.

Modern design and fashionable appearance.

The LCD display can be seen clearly even in the dark.

Tempered glass surface can avoid finger scratch.

The touch button is easy to operate.

Accurate comfort control can keep the temperature within 1 ° C of your set value.

Data is automatically stored when the power is turned off.

The WiFi model can be remotely controlled using a mobile app/intelligent speaker voice control.

2.Product parameters

Temperature sensing element	Thermistor
control accuracy	±1°C
Installation hole spacing	60mm (standard)
work environment	0-40°C
Power supply voltage	110~230VAC 50\60Hz
Rated power	5A
Shell material	Aluminium alloy
temperature range	5-35°C (Adjustable)

3.Operating instructions

Temperature controller reset: After the initial installation of the temperature controller, please reset the temperature controller. In the shutdown state, press and hold the "▲" key for more than five seconds until 00 appears or the LCD screen is fully displayed. After completing the temperature controller reset, the temperature controller can work normally.

Switch: Shortly press the "⏻" key to turn on or turn off the thermostat.

Child lock settings: press the "M" key for 3 seconds, turn on or off the child lock function, the thermostat is running normally, and the key function is invalid.

Setting temperature: On power-on, adjust the setting temperature by pressing "▲" or "▼" key, and set the temperature to change by 1 ° C once per key.

Mode switching: Shortly press "□" key to switch between cooling and heating modes (the combination of air conditioning and underfloor heating is used to switch between fan plate cooling, fan plate heating, underfloor heating, and co heating modes).

Wind speed switching: Shortly press "M" key for high, medium, low and automatic wind speed switching.

Manual automatic switching: Press and hold the "▲" key for 3 seconds to switch between manual mode or automatic mode. The automatic mode can be programmed and set.

Time setting: shortly press the "M" key to set the time, and the time will flash. Press the "□" key to switch between minutes, hours, and weeks, and press the "▲" or "▼" keys to adjust the value.

Single-time timing setting: When starting up, you can set a single timed shutdown. When shutting down, you can set a single timed startup: shortly press the "M" key for flashing time, and then press the "□" key until the timing "-:--" appears. Press the "▲" or "▼" key to set the specific timing for turning on or off. After setting, press the "M" key to exit. At this time, the screen shows a "⌚" mark, indicating successful setting.

Cancel the single timing setting: press and hold the "▼" key when starting the machine: cancel the timing shutdown.

Press and hold the "▼" key when shutting down the machine: cancel the scheduled startup.

4.Show Introduction

5.Advanced setting

Press and hold the "▲" and "▼" keys for 3s while shutting down the machine to enter the advanced setting function. The specific operation is as follows: Then briefly press "□" key to switch parameters, press "▲" and "▼" to adjust parameter values, and press "⏻" key to exit saving.

Numbers	Current display value definition	Range	Explain	Default
00	Correction value of indoor temperature	±10.0°C	Adjust to the correct room temperature	0°C
01	Set the upper temperature limit	60°C	Set the maximum temperature	40°C
02	Set the lower temperature limit	5°C	Set the minimum temperature	5°C
03	Switch deviation setting	0-10.0°C	Set output deviation value	1.0°C
04	Low temperature protection function	00-01	00 off, 01 on	00
05	Adjust to correct room temperature	00-10	0-10 second delay output time	00
06	Controlled cooling air volume	00-01	00 controlled, 01 uncontrolled	00
07	Heating air volume controlled	00-01	00 controlled, 01 uncontrolled	00
08	Screen off function selection	00-02	00 screen off, 01 room temperature, 02 always on	01
09	Restore factory settings	00-01	01 Restore factory default	00

6.Installation method

1. Remove the front panel of the thermostat with a screwdriver.

2. Install the rear shell of the thermostat in the cassette on the wall, tighten the screws, and then fix the front panel of the thermostat on the rear shell.

3. Fix the snap at the bottom of the thermostat.

7.Wiring diagram

8.WiFi connection

WiFi reset:(All products have been reset with WIFI before leaving the factory. To ensure the wifi configuration is smooth or the user misoperation and other reasons, it is recommended that all wifi configurations should be initialized and reset.): In the shutdown state, long press the "⏻" key of the temperature controller, and 00 will appear. Then press the "▲" key to adjust 00 to 01, and then press the "⏻" key to save to complete the wifi reset of the temperature controller.

Connect the device to the APP (first scan the QR code to download the APP, complete the registration, and then follow the following steps to configure the WiFi)

1. Bluetooth connection

Turn on the Bluetooth function of the phone, and then open the downloaded APP. Wait a few seconds for the following picture to appear, click "Go to add".

2. Search for device

The password appears automatically or manually enter the password. Click "Confirm" to show the percentage connection progress.

3. Connection complete

Click on the "+" sign. Connection complete.

4.Auto connect

Or choose automatic connection. Wait for the following picture to appear, click "Next".

5. Connection complete

Click "Done" to complete the connection.

Two-dimensional code of APP

FCC Warning:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
