2.1 Purpose

Standardize the product specifications and testing methods for mobile communication terminal antennas manufactured by **Shenzhen Tianweixun Wireless Technology Co., Ltd.**, to prevent errors caused by variations in testing conditions or methods.

3.1 Main Antenna

3.1.1 Electrical Specifications and Materials of the Main Antenna

This report primarily provides the test results of the structural performance parameters of the prototype antenna P2 (P3, P4).

Physical diagram of the antenna designed by Tianwei Information

3.1.2 Antenna Type

Type: PIFA antenna

3.1.3 Working Frequency Band for Antenna Design

The antenna operating frequency bands are 2400 MHz to 2500 MHz and 5100 MHz to 5800 MHz.

3.1.4 Main Antenna Measurement Data in the ETS-SG24SYSTEM 3D Test System

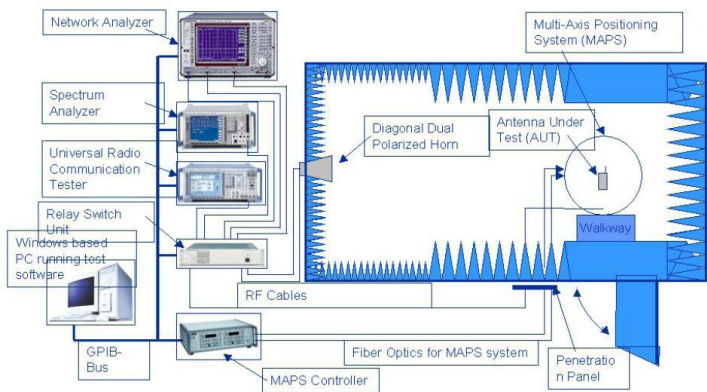

Figure (2) ETS Testing System

5.1 Product Assembly Diagram

5.1.1 Antenna Composition

The antenna integrates an FPC antenna and a coaxial cable. As shown in the figure, the MIAN port is soldered with its pin hole facing downward when placed flat, and the AUX port is similarly arranged with its pin hole facing downward.
