

User Manual

Safety Instructions

- Do not switch on or operate the unit before you have read the instruction manual.
- Do not look into the lens directly——this can cause eye damage.
- Do not let children get close to the projector as they may look into the lens directly.
- Do not turn on the projector before connecting with other components.
- Do not attempt to disassemble the machine, if the disassembly of the safety risks, will not be responsible.
- Do not cover the surroundings of the projector with soft materials such as blankets, and it is recommended to place the device on a table for use.
- Do not use the projector in a wet environment, do not place liquids on or close to the projector. Please pull out the power plug from the wall plug if the projector overheats and smoke appears.
- Do not block the air inlet and ensure the projector is placed in a well-ventilated location.

b) Choose a video player to cast video.

MiracastReceiver

- a) Enable Miracast on the projector, wait for the connection prompt.
- b) Select the projector from your device's wireless display list to begin mirroring.

Common Troubleshooting Methods

- If the product fails to connect to the internet, check the network connection and ensure the wireless network settings are correct.
- If you encounter audio output issues or anomalies, check the audio connection and adjust the volume settings.
- If you experience unresponsive operation after restoring the device to its factory settings, you need to power it on, wait for 15 minutes, and then restart it. After that, it can be used normally—ensure sufficient loading time for system initialization.
- If there is no display or display abnormalities, ensure the HDMI connection is secure and try replacing the HDMI cable.
- When calibrating the projector, only the vertical direction is calibrated, When performing manual calibration, the device must be placed on a horizontal surface.
- If the product fails to power on, check the power connection and

ensure the power outlet is functioning properly.

- Blue spots are a characteristic of the LCD screen technology used in this single-LCD product. While they can occasionally be more visible due to external pressure, they are a known physical trait of the display and cannot be eliminated.
- For other issues, please refer to the user manual or contact the relevant personnel for assistance.

Disclaimers

Our company reserve the right to make changes about the contents of this instruction manual without any advance notice. Please kindly understand.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
