Chargers and Batteries

Chargers and Batteries
Before using any charger to charge this headset, please check whether the specifications marked on the charger meet the requirements (it is recommended that the output voltage of the charger is DC5V +/-0.25V, and the output current is: 100mA-500mA). Excessively high charging voltage is very likely to damage the Bluetooth headset.
Warning: Only use the charger that has been certified and is matched with this device. Using a charger of other specifications may violate the approval and warranty terms of the device, and may pose a danger. If the product is shipped with a charging cable from the factory, it is necessary to connect a charger that has passed the 3C certification or a computer to charge it. It is prohibited to severely cut/damage the product, as severe impact may damage the electronic mainboard and the battery.

Charging the Battery

This headset uses an internal non-replaceable rechargeable battery. Do not attempt to remove the battery from the headset as it may cause damage to the headset. When the headset is not used for a long time, store it in a dry and ventilated place and charge it once every two months.
1. When the battery is low, the red light on the headset will constantly be on. There will be a low battery prompt sound every 1 minute, beep, indicating that the battery is insufficient. Continuing to use will automatically shut down. At this time, charging is required.
2. Plug the charger into the AC power socket.
3. When charging, the right red light will constantly be on. If charging has not started, disconnect the power from the headset and reconnect it again to try once more. After being fully charged, the red light will go out and the blue light will constantly be on.
4. The actual call duration and standby time may vary depending on the usage settings, methods and environment of the mobile phone.

Wearing Instruction

Hang the earphones behind the neck, and the speakers on both sides are attached to the cheekbones to adjust the wearing comfort.
Do not twist or bend the rear hanger excessively. Avoid damage to internal light guide elements.
