Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

IX. Common problems:

What should be noted before use?

R: Before use, please carefully read our user manual and follow the detailed steps. When taking to the doorbell, please place your phone at least 5m away from the doorbell to avoid signal interference or noise.

When does the doorbell need to be restarted and how to reset it?

R: When the doorbell cannot work properly or cannot connect to the phone, it needs to be restarted and reset. Press and hold the 'Reset' button, hear a "beep" prompt sound, restart and reset, and then add the device again.

What should I do if the repeated addition of devices fails?

R: After the first failed addition, please restart the doorbell, long press the 'Reset' button, hear a "beep" prompt sound, and then try adding again. The device only supports 2.4GHz WiFi network. Please ensure that you are using a 2.4GHz WiFi network and enter the correct WiFi password.

Note: 5G networks are not currently supported, and all routers will have a 2.4GHz WiFi network option.

4. Can't preview and watch the doorbell video correctly?

R: Check if the network is functioning properly and bring the doorbell closer to the router. If it still cannot be used, please restart the doorbell and add it again.

5. How to change the doorbell network to another router?

R: First delete the device on the app, and then reconfigure the network for the doorbell.

6. Why am I unable to receive push message notifications through my mobile app?

R: Please ensure that the app is running properly on your phone and that the phone system has enabled relevant push functions such as SMS notifications and permission confirmation.

7. Equipment installation location?

R: Do not install doorbells on metal doors to prevent them from blocking WiFi signals. When installing the doorbell, please follow the user manual to complete the operation. After testing that the doorbell is working properly, install it in the best signal position.
