

Pro T6

Please read this guide carefully before use and reserve it for future use.

Bluetooth pairing:

1. Rotate the charging box to take out the earphone and turn on the Bluetooth function of the mobile phone. Search for the Bluetooth name 'PRO T6' to connect when using it for the first time.
2. In future, only the Bluetooth function of the mobile phone is turned on. Just take out the earphone and it will automatically connect to complete the pairing.
3. When connecting the same set of Pro T6 earphones to a new device, the new device will only be able to search for the Bluetooth name 'Pro T6' and connect successfully, after you turn off the Bluetooth on the previously connected device.

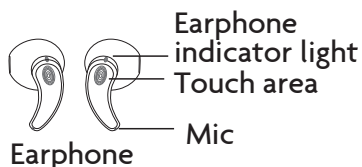

Earphone charging:

1. When the earphone is out of power, it will emit a prompt tone. At this point, simply put the earphones into the charging case. (It takes about 30 minutes to fully charge.)

2. When the earphones are put into the charging case, the indicator lights of the earphones and the charging case will always be on.
3. When the charging case fully charges the earphones, the indicators on the earphones and the charging case will automatically turn off.
4. The charging case can charge the earphones up to 5 times on one charge.

Charging case charging:

1. When the charging case is out of power, the indicator light of the charging box will flash quickly.
2. When the charging case is charging, the indicator light of the charging case starts to flash slowly.
3. When the charging box is fully charged, the indicator light of the charging case is always on. The charging case will be fully charged in about 45 minutes.

1. When a call comes in, touch the touch area of the headset once to answer, & touch again to hang up.
2. When there is a call, press and hold for 2 seconds to refuse call.
3. When listening to music, click to play/pause the music.
4. When listening to music, double-click on the left side to play the previous song, and double-click on the right side to play the next song.
5. When listening to music, click on the left earphone three times to increase the volume, and click on the right earphone three times to decrease the volume.
6. When not listening to music, long press the touch area for 2 seconds for the intelligent voice assistant.
7. While listening to music, press and hold for 2 seconds to change the sound effects.

Specifications:

Model Number: Pro T6
Bluetooth version: 5.4
Bluetooth signal distance: 10m
Microphone sensitivity:- 42dBV/Pa
The battery type:
Rechargeable lithium-ion batteries
Battery capacity:
30mAh(Earphone) / 210mAh(Charging case)
Music time:
(50%Volume)5-6h(One charge)20h(With Charging case)
Charging time:
30Min(Earphone) / 110Min(With Charging case)
Battery capacity, music playback time, and charging time are all measured at laboratory room temperature of 25°C using a standard charger. Due to factors such as usage, environment and individual differences in chargers, the actual data may vary. The specifications and parameters are all laboratory test data, and this manual is for reference only. The specific functions and

product pictures may have slight differences from the actual product. Please refer to the actual product.

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help. Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
