

FCC ID Label & Location

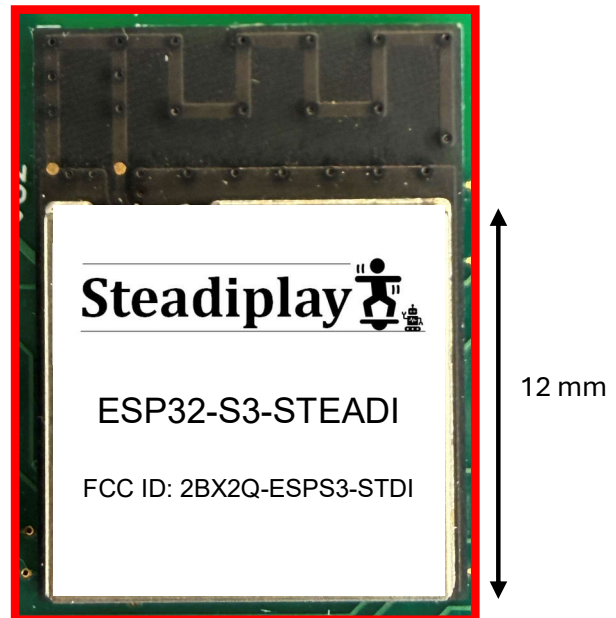

Interior Label: A 12 x 12 mm permanently affixed physical label with the FCC ID: 2BX2Q-ESPS3-STD1 will be applied to the module's 13.55 x 13.55 mm metal shield area and clear of the PCB antenna at the top edge (see image below). The label covers the existing original FCC ID 2AC7Z-ESPS3MINI1 marking, so only FCC ID 2BX2Q-ESPS3-STD1 is visible.

Label construction: 2 mil white polyester with 1 mil matte laminate, permanent pressure-sensitive acrylic adhesive rated for -40 to 85 °C, black thermal print, permanently affixed per 47 CFR 2.925(d). See also the module integration instructions, Section 2.8.
