Operation Instructions

BT Pairing:

- ◆ Turn on the keyboard, then press and hold “FN + B” for 3 seconds to enter BT pairing mode.
- ◆ Open the BT settings on your device and search for “BT Keyboard.”
- ◆ Tap “BT Keyboard” and wait until the BT indicator stops flashing. Once pairing is successful, the blue light will turn off.
- Press FN +  to cycle the backlight brightness: Low → Medium → High → Off
- Press FN +  to switch the backlight color
- Press FN + Space to turn the touchpad on/off

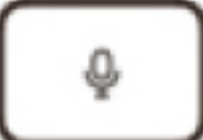

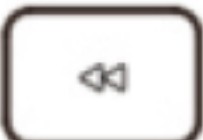

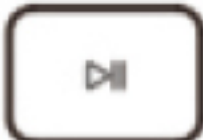

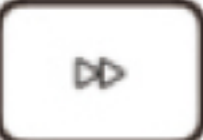

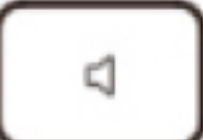

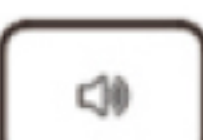

Product Features

- ① BT indicator: Flashes while the keyboard is in pairing mode.
- ② Caps Lock indicator: The letter A appears when Caps Lock is on. No indicator is shown for lowercase input.
- ③ The display shows the battery level during both active use and standby mode.
The screen turns off in sleep mode. When the battery level drops below 20%, the % symbol on the display will flash.
- ④ While charging, the upper bar on the display pulses on and off. When the battery is fully charged, the lower bar remains solid.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
