

AI Smart Recorder

User Manual

Product Specifications

Product Name	AI Smart Recorder
Model	NotePin X9

Dimensions	52*20*12MM
Language	Multi-language
Weight	Approx, 19g
Display	0.96 inches, Resolution80*160
Recording Format	WAV / OPUS
USB	USB-C interface
Battery	320mAh
Color	black
Charging Specification	5V/1A Input
Standby with APP	~40days (Default screen-off state)
Recording with APP	15~20H(Default screen-off state)
Standby without APP	~40days (Default auto-shutdown disabled)
Recording without APP	15~20H(Default screen-off state)

Button-Operations

1	Reset button	2	microphone
3	charging port	4	display screen
5	Power/Pause/Resume Button	6	Hanging line port

Equipment Operation

Power on: After shutting down, press and hold the power button for 3 seconds.

Shutdown: After turning on, press and hold the power button for 3 seconds.

Standby: After 30 seconds of power on, the device will automatically enter standby mode.

Normal recording: After turning on the device, press the power button briefly. The screen timer starts recording, short press the power button again to save the recording.

Reset: Press and hold the reset button for more than 9 seconds to reset and turn on the device.

Downloading the APP

Please download the APP to activate the device upon first use.

1. Android users can scan the QR code below to download the APP.

2. Both Android and iOS users can search for "SoundCloud Voice Transcription" in their respective app stores, find the application, and install it.

Connecting to the APP

1. After successfully downloading and installing the APP, open it and complete user registration.

2. With the device powered on, switch the device to call recording mode; then turn on your phone's Bluetooth, enter the APP, and click "Connect Device".

3. Search for the Bluetooth device name (NotePin X9) and click

to connect. If the connection fails, restart Bluetooth and try connecting again using the method above.

Function Description

Real-time Transcription: Records audio and transcribes it in real-time, supporting multiple languages.

Import Audio/Video: Allows importing local audio/video files from your phone or audio/video from third-party apps for transcription, generating summary minutes, and creating mind maps.

Simultaneous Interpretation : Records audio and performs real-time translation, supporting multiple source and target languages.

Recorder Transcription: Click 'Start' to begin recording; click again to pause. Recording files are automatically saved and can be viewed, transcribed, used to generate summary minutes, and create mind maps within the APP. When the device screen is on, short pressing the Power Key performs the same operation.

Recorder Files: Click 'Transfer' to move recording files from the recorder's internal storage to the APP. These files can then be transcribed, used to generate summary minutes, and create mind maps.

Precautions

Legal Restrictions

Please strictly comply with relevant laws and do not use this product illegally. The company does not make any promises or assume any responsibility for the consequences of illegal activities.

Privacy Protection

All data is stored solely on the recording device, unless you synchronize the recording files with the application. In this case, the files will be stored on your smartphone.

Data Security

The company is not responsible for the loss or damage of personal data caused by hardware, software, product maintenance, battery replacement, or other unforeseen circumstances. The company shall not bear any responsibility for any other indirect losses arising therefrom.

Product Settings

Due to firmware upgrades, the actual settings and usage methods of this product may differ from this manual. Please understand that changes in product performance and functions may not be notified to you in advance.

Safety

Keep the device and accessories out of reach of children to prevent choking or other injuries.

Do not expose the battery (the battery pack or the installed battery) to fire or excessive heat (such as sunlight).

Maintenance

Do not use chemicals or reagents to clean the recorder, as this will damage and corrode the recorder's surface.

Battery

If the product is not used for an extended period, charge and discharge it every three months to prevent battery damage.

Storage Capacity

The system software will occupy a small portion of the storage space. The actual available capacity will be slightly less than the capacity indicated in the specifications.

Low-power Radio Wave Radiation Motor Management Regulations
Low-power radio frequency equipment that has obtained confidential verification certification shall not have its frequency changed, power increased, or original design characteristics and functions altered without approval by the company, merchant, or user. The use of low-power radio

frequency equipment must not affect flight safety or interfere with legal communications: if interference is found, it should be stopped immediately and can only be used again after improvements are made until no interference occurs. The aforementioned legal communications refer to radio communications operating in accordance with the Telecommunications Management Act. Low-power radio frequency equipment must tolerate interference from legal communications or industrial, scientific, and medical radio wave radiation electrical equipment.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15

of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
