

Content: See the right figure; the left figure shows the position reference.

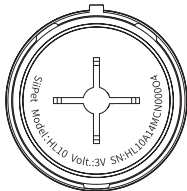

Area: Bottom of the product back cover

Process: Laser engraving

Font: Source Han Sans Normal

Font size: 5pt

Note: This image shows a flat-view effect. However, since the actual product printing area is curved, if the current font size is too large or causes obvious distortion, you may slightly adjust the font size and margins on your own to ensure the text is clearly visible. However, you must not change the area where the text is located (e.g., do not move it to the upper area of the product).

Siipet
Model:HL10 Volt.:3V SN:HL10A14MCN0000A

Content: See the figure on the right; the figure on the left shows the location.

Area: Inside the battery cover

Process: Laser engraving

Font: Source Han Sans Normal

Font size: 3.8 pt
